Experience

WerkTek

Jacksonville, Florida

July 2014 - November 2024

Senior Software Developer

- Led the rewrite effort of their legacy site with a team of 4 developers
- Ran daily stand up and assigned out work for about one year for a team of 4 developers
- Wrote a large portion of the front end and data layer using ExtJs, Angular, C#, and SQL
- Engineered a translation service supporting 3 languages and used by over 30,000 global users
- Produced a desktop application for users with intermittent internet access using Electron and Angular
- Developed a mobile site with time sheets, time sheet approval, and PTO entry using Angular
- Made a new time sheet application and several supporting pages using Angular and NgRx
- Created new approval workflow system using Node-Red and TypeScript
- Built several utilities like file generators and importers for processing time sheet and personnel data
- Constructed several microservices by breaking the existing monolithic application into manageable pieces using .NET Core
- Worked on projects as a team and as a solo developer simultaneously
- Worked in the office for about 6 years and worked remotely for the remaining 4 years
- Worked in an agile setting with daily standup and work item tracking

Greenshades Software

Jacksonville, Florida

September 2013 - July 2014

Software Developer

- Worked on the employee portal with a team of 3 developers
- Rewrote the single sign on, sign up, and password reset features
- Worked on a team of 5 developers, a QA, and a project manager
- Worked in an agile setting with standup and sprint planning

Web Data Software

Myrtle Beach, South Carolina

November 2010 - September 2013

Technical Account Manager

- Worked with multiple clients directly and was the primary account manager for two clients
- Created customer websites with good SEO including a restaurant, water park, car dealership, and several real estate sites
- Created real estate agent manager dashboard that reported on recent sales
- Created an Excel generation program using MLS data for real estate agents
- Setup a new law office's desktop computers and Microsoft accounts
- Worked primarily as a solo developer

Education

Horry-Georgetown Technical College

Associate's in Computer Science with a Programming Emphasis

2010
